

2019 SURVEY OF NEW HAMPSHIRE HIGH SCHOOLS

ECONOMICS REQUIREMENT: STANDARD 6 WITHIN THE CURRICULUM FRAMEWORKS

JANUARY 1, 2020
NH JUMP\$TART COALITION
WWW.NHJUMPSTART.ORG

Background:

Since June 12, 2006, the New Hampshire State Board of Education has identified the 20 credits required for graduation to include one half credit of Economics under Administrative Rule Ed 306.27(n), and the Revised NH Curriculum Frameworks standard SS:EC:6 specifies that “students will be able to explain the importance of money management, spending, credit, saving, and investing in a free-market economy.”

This requirement represents the framework of a comprehensive personal finance curriculum that begins early in elementary school, builds on foundational knowledge and results in high school graduates who are competent, confident managers of their own money.

In 2013, the NH Jump\$tart Coalition released its first study of New Hampshire high schools to determine the extent of Personal Finance instruction in the Granite State. **Three high schools** were given a Governor’s Commendation for exceeding the State’s minimum requirements for its students with the additional graduation requirement of a half credit of Personal Finance. In April 2014, a recognition ceremony with officials from **Bedford High School, Hinsdale High School** and **Newfound Regional High School** was held with the Governor and Executive Council at the State House.

The study was updated in 2017 with significant progress reported with eight NH school districts requiring a standalone personal finance course for graduation. During the summer of 2019, the coalition updated its statewide analysis to identify any financial literacy progress since the 2017 release. The data was obtained by visiting each high school’s website and downloading their Program of Studies (*as of June 30, 2019*).

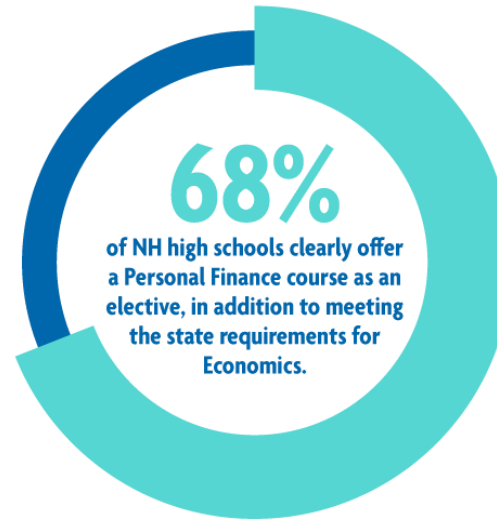

The results of this current study are located to the right:

With curriculum decided at the local level, it can be challenging to make accurate comparisons of what our children are being taught in each of the state's school districts.

A [2018 study](#) by **Next Gen Personal Finance** gave New Hampshire a Report Card Grade of C, stating that only 4.3% of NH students qualify for their "Gold Standard" of financial education by receiving at least one required semester of Personal Finance training.

The [2017 National Report Card on State Efforts to Improve Financial Literacy in High Schools](#) by the **Center of Financial Literacy at Champlain College** gave New Hampshire a B Grade by referencing the state requirement for Economics and its associated Curriculum Frameworks.

Our statewide survey drills down even deeper by listing the specific courses by each NH high school and their district's graduation requirement. We are encouraged by the positive movement for financial education based on this year's study and we will continue to promote the importance of providing our children the instruction they need to become financially capable adults.

The NH Jump\$tart Coalition believes that parents remain the singular force for change for the schools in their communities.

The Check Your School Campaign

NH Jump\$tart has embraced the ***Check Your School*** national public-engagement campaign. *Check Your School* is designed to support the goal of Jump\$tart's Project Groundswell which is to increase and improve effective financial education in our nation's classrooms. Through the *Check Your School* campaign and its [website](#), we hope to harness the "power of parents" to start the conversation about the importance of financial literacy and the need for financial education at their own kids' schools. Grandparents, guardians, aunts, uncles, neighbors, friends, and even students themselves have a role to play and are encouraged to participate.

New Hampshire is positioned to take a leadership role in the youth financial literacy arena – the students have a demonstrated desire to learn how to manage their money; we have educators who want to teach this content and have the opportunities to be trained in this field (*NH Jump\$tart conducts free, annual teacher training workshops*); we have state educational standards in place; and there are hundreds of curricula and resources* (*many of them provided at no cost*) available.

All that is needed is community will.

*The [Jump\\$tart Clearinghouse](#) is the premier financial literacy online resource for educators, parents, students and others to find effective, financial education resources from various sources.

NH Jump\$tart is dedicated to improving the personal financial education of students throughout New Hampshire. Since our creation in 2000, NH Jump\$tart (a non-profit 501(c) 3 organization) has reached thousands of children and teens with information about financial literacy and a message of smart consumer behavior.

There is no paid staff. All our successes are accomplished through the volunteer efforts of individuals bound by the common passion of teaching children sound financial habits. Visit nhjumpstart.org for more information about NH Jump\$tart.
